Summary

Software Engineering student with strong expertise in Java, Data Structures and Algorithms, and full-stack web development. Experienced in building scalable backend systems, designing REST APIs, and deploying production-ready applications through hands-on projects and Amazon SDE internship experience.

Education

- **Jawaharlal Nehru Technological University, Anantapur** 2023 – Present
  B.Tech in Computer Science Engineering CGPA: 8.4
- **Masai School – Empower Her Program** 2025
  Full Stack Development Bootcamp

Experience

- **Software Development Engineer Intern** May 2025 – Jul 2025
  Amazon Development Centre India Bengaluru, India
  - Engineered backend integration enabling ESGS services to communicate directly with Triton by reverse-engineering Paragon request workflows and building secure service communication logic in Java.
  - Reconstructed authentication and request validation pipelines improving reliability of internal testing systems used by engineering teams.
  - Optimized testing workflows by reducing service dependencies and simplifying system communication layers across internal services.

Projects

- **MemoryLane – Personal Memory Management Platform (React.js, Node.js, Express.js, Supabase)**
  GitHub | Live
  - Built a full-stack memory management platform using React.js, Node.js, and Supabase with REST APIs to store and organize personal memories and media.
  - Integrated JWT authentication and Cloudinary storage enabling secure management of **100+ records** with deployment on Vercel and Render.
- **Paste-Box – Secure File Sharing Platform (React.js, Node.js, MongoDB Atlas)** GitHub
  - Developed a file sharing platform using React.js, Node.js, and MongoDB Atlas enabling secure upload and sharing through REST APIs.
  - Implemented JWT authentication and Cloudinary storage supporting secure upload and retrieval of **200+ files**.
- **Time-Track AI – Productivity Analytics Dashboard (React.js, Firebase)** GitHub | Live
  - Designed a productivity tracking dashboard using React.js and Firebase enabling users to manage daily activities within a 24-hour time limit.
  - Built real-time analytics using Recharts and Firebase database supporting **50+ tracked activities**.

Technical Skills

Programming Languages: Java, Python, C
Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js
Databases: MySQL, Supabase (PostgreSQL), MongoDB Atlas, Firebase Realtime Database
Backend: REST APIs, JWT Authentication, API Integration
Tools: Git, GitHub, VS Code, Postman
Cloud & Deployment: Vercel, Render, Netlify, AWS Basics

Certifications & Achievements Drive Link

- Amazon SDE Internship Completion Certificate – Amazon Development Centre India (2025)
- Amazon Future Engineer Bootcamp – Completed 10-month program on Java and Data Structures
- Introducing Generative AI with AWS – Udacity (Accenture)
- AI Prompt Engineering – Naipunyam Program (Government Skill Development Initiative)
- Global Leadership Program on Systems Thinking – Foundation for Excellence & Rishi hood University (2025)
- Amazon Scholarship Recipient (2023) – State Engineering Entrance Merit
- FLY Scholar Program Certification – Competitiveness Mindset Institute
