PROFESSIONAL SUMMARY

Highly driven Software Engineering undergraduate with strong expertise in Java, Data Structures & Algorithms, and backend system development. Experienced in building scalable REST APIs and improving distributed workflows during Amazon SDE internship. Demonstrates solid understanding of SDLC, database design, and secure application architecture with a focus on delivering reliable, high-performance solutions.

EDUCATION

Jawaharlal Nehru Technological University, Anantapur
B.Tech. in Computer Science Engineering
Secured 8.4CGPA out of 10.0 *08*/2023-Present

Narayana Junior College, Kadapa
MPC in Intermediate
Secured 966 marks out of 1000 06/2021-05/2023

SKILLS

Technical Skills – Programming skills: C, Java, Pytho

Core Computer Science: Data Structures & Algorithms, DBMS, Operating Systems, Object-Oriented Programming, SDLC

Backend Development: Node.js, Express.js, REST API Design, JWT Authentication, Middleware Architecture, Unit Testing (Jest)

Frontend Development: HTML, CSS, JavaScript, React.js

Databases: MySQL, PostgreSQL ,Supabase , MongoDB

Cloud & Deployment: AWS (Fundamentals), Render, Netlify, Vercel

Tools & Version Control: Git, GitHub, Postman.

Soft Skills – Problem Solving, Communication, Adaptability, Time Management, Quick Learning

PROJECTS

Project Title: MemoryLane_Personal GitHub Live Demo
Tech Stack: React.js (Vite), Node.js, Express.js, Supabase (PostgreSQL & Auth), Cloudinary, REST APIs, JWT Authentication, CORS & Security Middleware, Git & GitHub, Netlify (Frontend Deployment), Render (Backend Deployment).

- Built a full-stack web application using React (Vite), Node.js, and Express.js with structured REST APIs and modular backend architecture.
- Implemented secure user authentication and database management using Supabase (PostgreSQL & JWT-based Auth).
- Integrated Cloudinary for image upload and media storage with proper backend validation and error handling.
- Deployed the application in a production environment using Netlify (Frontend) and Render (Backend) with environment variable management and CORS configuration**.**

Project Title: Paste-Box GitHub Live Demo
Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, Mongoose, JWT Authentication, Cloudinary, REST APIs, Tailwind CSS, Render, Netlify.

- Developed a full-stack file sharing application using React, Node.js, Express, and MongoDB with structured REST APIs.
- Implemented JWT-based authentication and secure file upload handling with Cloudinary integration.
- Designed backend data models using Mongoose and ensured proper validation and error handling.
- Deployed the application on Render and Netlify with environment variable and CORS configuration.

Project Title: Time-Track AI – Daily Time Tracking & Analytics Dashboard GitHub Live Demo
Tech Stack: React (Vite), Tailwind CSS, Recharts, Firebase Authentication, Firebase Realtime Database, Git, GitHub, Vercel App

- Developed **Time-Track AI**, a full-stack productivity web application that helps users manage daily activities within a 24-hour time limit.
- Implemented secure authentication, real-time database integration, and complte activity management (add, edit, delete) with smart validation logic.
- Designed a responsive UI with dynamic analytics dashboards, including interactive pie and bar charts for visualizing time usage.

EXPERIENCE

Software Development Engineer Intern
Amazon · Internship
May 2025 – July 2025 | Bengaluru, Karnataka, India (On-site)

- Built a direct integration between ESGS and Triton, removing dependency on Paragon and simplifying testing workflows.
- Reverse-engineered request routing and implemented secure authentication and validation logic in Java.
- Improved end-to-end testing reliability and reduced system dependencies.
- Worked in Agile sprints, contributing to design discussions, code reviews, and production-ready backend development.

CERTIFICATIONS

- **FLY Scholar Program Certification** – Competitiveness Mindset Institute, USA (Leadership & Problem-Solving Program), 2024
- **Amazon SDE Internship Completion Certificate** – Amazon Development Centre India (May–Jul 2025)
- **Amazon Future Engineer (AFE) Bootcamp Certificate** – Completed 10-month Java & DSA Program, 2025

- **Introducing Generative AI with AWS** – Udacity (Accenture) | Covered foundational concepts of Generative AI, AWS AI services, and real-world AI applications (Aug 2025)

ACHIEVEMENTS

- **Amazon Scholarship Recipient (2023)** – Awarded based on exceptional performance in the **State Engineering Entrance Examination**.
- **Amazon SDE Intern (Summer 2025)** – Worked on ESGS–Triton integration improving testing speed and reducing dependencies
- Selected as mentee at **Masai School Education-Empower Her Season 2**.
